

**RECIPIENT CONTROL OVER ASPECTS**  
**OF INCOMING MESSAGES**

**Abstract of the Invention**

An information system includes a plurality of messaging systems, a data center and a control system. The plurality of messaging systems process respective messages intended for recipients. The data center is in operative communication with the plurality of messaging systems and stores a recipient preference profile associated with each respective recipient. The control system accessing an intended recipient preference profile corresponding to an intended recipient of a message and uses the intended recipient preference profile to process the message.
